

High Bridge Wind Project

Case No. 18-F-0262

1001.39 Exhibit 39

Wastewater Interconnection

EXHIBIT 39 WASTEWATER INTERCONNECTION

The proposed Facility is not expected to require interconnection to a municipal wastewater system. As a result, the requirements of 16 NYCRR § 1001.39 are not applicable to the Facility. It is anticipated that the wastewater needs of the operations and maintenance (O&M) facility will be satisfied through construction of an individual on-site wastewater treatment system (e.g., septic system). The Applicant will work with the Town of Guilford and the Chenango County Department of Health, as appropriate, throughout the installation process. The system will be constructed in accordance with the standards set forth in 10 NYCRR Part 75, Standards for Individual Onsite Wastewater Treatment Systems.
